DETAILED ACTION

1. This communication is responsive to Amendment filed 05/29/2007.
2. Claims 1-18 and 20-22 are pending in this application. Claims 6 and 16 are independent claims. In Amendment, claims 6, 8, 10, 13, and 15-16 are amended; claims 19 and 23 are cancelled; and claims 1-5 are withdrawn from consideration. This Office Action is made final.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 6-18 and 20-22 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claims 6-18 and 20-22 cite a method and circuit for performing an arithmetic function in accordance with a mathematical algorithm. In order for claims to be statutory, claims must either include a practical/physical application or a concrete, useful, and tangible result. However, claims 6-18 and 20-22 merely disclose steps/components for performing an arithmetic function without further disclosing a practical/physical application or a useful and tangible result since the claims appear to preempt every substantial practical application of the idea embodied by the claim and there is no cited limitation in the claims that breathes sufficient life and meaning into the preamble so as to limit it to a particular practical application rather than being so broad and sweeping as

to cover every substantial practical application of the idea embodied therein. Therefore, claims 6-18 and 20-22 are directed to non-statutory subject matter.

Response to Arguments

5. Applicant's arguments filed 05/29/2007 have been fully considered but they are not persuasive.

a. The applicant argues in page 8 third paragraph for claims 6-18 and 20-22 rejected under 35 U.S.C. 101 that the claims are directed to statutory subject matter as having a concrete, useful, and tangible result since the result of an arithmetic function that is stored in register.

The examiner respectfully submits that the amended claims do not quite fulfill the requirement under 35 U.S.C. 101 since the claims preempt every substantial practical application of the idea embodied by the claim and there is no cited limitation in the claims that breathes sufficient life and meaning into the preamble so as to limit it to a particular practical application rather than being so broad and sweeping as to cover every substantial practical application of the idea embodied therein. Generally, the claims do not specifically disclose a particular practical application of utilizing the final result; thus they are preemptively cover every practical application of using the claimed invention.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
